

BAA 05-44

Predictive Analysis for Naval Deployment Activities (PANDA)

Briefing to Industry:
Unclassified Proposal Submission
Mr. Rob Simmons
DARPA/IXO BAA Coordinator
16 September 2005

This presentation is UNCLASSIFIED

Overview

- Unclassified Proposal Submission Process
- CLASSIFIED proposal submissions will be discussed by Mr. Fisher
- Establishing a New Proposer Account
 - Proposers may submit proposals at the Unclassified, Secret, Top Secret, and/or SCI levels
 - This process is for UNCLASSIFIED submissions ONLY

Open BAAs

As the close date draws near, heavy traffic on the web server may cause delays. Plan ahead and leave ample time to prepare and submit your proposals.

The following BAAs are currently open for IXO. Use the hyperlinks listed below to go to the desired BAA. To view or download BAA Tool instructions [click here](#).

BAA Number	Description	Open Date	Close Date
BAA 04-17	Innovative Information Exploitation Office For questions pertaining to the BAA04-17, please email BAA04-17@darpa.mil http://www.darpa.mil/ixo/solicitations/IXO/index.htm	3/8/2004	3/8/2006
BAA 05-04	Dynamic Tactical Targeting: Tactical Exercises and System Test For questions pertaining to the BAA05-04, please email BAA05-04@darpa.mil http://www.darpa.mil/ixo/solicitations/DTTEST/index.htm	10/15/2004	10/15/2005
BAA 05-14	Integrated Battle Command The Integrated Battle Command program will develop transformational battle command decision-aid technologies to enhance the capability of commanders and staffs to plan and conduct integrated joint and effects-based operations in future campaigns. The decision aids will apply over the full continuum of near-simultaneous missions required in a campaign, to include major combat operations and various security, stability and reconstruction operations. The IBC program will provide automated tools to assist the commander and staff in generating, assessing and understanding the consequences of political, military (air, land, and sea), economic, social, information operations, and infrastructure (PMESII) effects, and constructing and evaluating plans that are based on the impact of multi-dimensional effects and the interaction among effects. Web: http://www.darpa.mil/ato/solicit/IBC/index.htm For questions pertaining to the BAA05-14, please email BAA05-14@darpa.mil	2/8/2005	2/7/2006
BAA 05-44	Predictive Analysis for Naval Deployment Activities (PANDA) The goal of PANDA is to automatically evaluate the behavior of all larger surface maritime vessels (not just those that we are already concerned about), to determine which ones are deviating from their normal, expected behavior in ways that may be indicative of an emerging threat. For questions pertaining to the BAA05-44, please email baa05-44@darpa.mil http://www.darpa.mil/ixo/solicitations/PANDA/index.htm	8/31/2005	8/31/2006

Account Request Instruction

Current Date: 12/2/2004 11:04:05 AM

DOD PKI Information-NEW REQUIREMENT:

The certificate must be installed prior to receiving your BAA account information.

Per DoD Instruction 8520.aa, DARPA is directed to implement the Public Key Infrastructure (PKI) security certificates to all web servers. PKI refers to a framework for a wide variety of components, applications, policies and practices to combine and achieve four principal security functions:

- Confidentiality – to keep exchanged information private
- Integrity – to prove that exchanged information has not been manipulated in transit
- Authentication – to prove the identity of an entity engaged in a transaction
- Non repudiation – to ensure that an entity can not deny participation in a transaction

This implementation will be done in phases. Phase one is now complete. During phase one, the PKI certificate was installed (NOT enabled) on the T-FIMS production web server. What this means is the certificate has assumed the role of our Secure Socket Layer (SSL) certificate, which encrypts data over the communication line (internet). Because of this change, we must be able to establish "trusted" relationships with all users connecting to <https://www.tfms.darpa.mil/baa>. To do this, every computer used to connect to T-FIMS must load a client-side certificate (there is no fee for this certificate). The certificate and instructions for installation are available at www.tfms.darpa.mil and click on the left menu item for DoD PKI Info.

This task MUST be completed prior to receiving your BAA username and temporary password. Once installed, please email the respective BAA mailbox for which you are proposing to confirm successful installation of the client-side PKI certificate. In the subject line of the email, please indicate "Certificate Installation Completed."

If you have any questions, comments, concerns, or problems with this requirement, please email tfms-help@darpa.mil and cc mchin@snap.org.

Thank you for your cooperation!

Account Information

NOTE: You must register for each open BAA that you wish to participate.

- ***You will receive a temporary password via email. The password received will only be used for allowing you access to change your password. It will not allow you access to the application. You will have 72 hours, from the time you receive your temporary password, to change the password. If this is not completed within the allocated time frame, your account will be de-activated.***

The password will be given out ONLY after an account request has been made and an email has been sent to the BAA 05-44 mailbox verifying that the PKI Security Certificate has been successfully installed on the system that will be submitting the files.

T-FIMS:
 A centralized database, with a web-based interface, that facilitates reporting and tracking of project status by DARPA Program Managers, Agents, and Awardees without regard to type of Award Instrument.

The PKI Certificate installation is mandatory, as this task MUST be completed prior to receiving your BAA username and TEMPORARY password. Once installed, please email baa05-44@darpa.mil to confirm successful installation of the client-side PKI certificate. In the subject line of the email, please indicate CERTIFICATE INSTALLATION COMPLETED. Once this has been done, a password will be sent out within 48 hours after DARPA has received your email.

Questions and Inquiries

- By email – send to baa05-44@darpa.mil
- For technical questions regarding account status or proposal submission, contact
 - Mr. Rob Simmons
 - DARPA/IXO BAA Coordinator
 - Vox: 571-218-4633
 - Email: baa05-44@darpa.mil
- DO NOT attempt to submit a CLASSIFIED proposal through the electronic upload process for UNCLASSIFIED submissions, as this is PROHIBITED
- Refer to Proposer's Information Package at <http://dtsn.darpa.mil/ixo/solicitations/PANDA/index.htm> so you may follow other submission guidelines, including those for CLASSIFIED submissions, as well as learn more about this BAA
